

Find the best energy solution for your client easier than ever!

Never again has a sizing tool been so easy! We, at Eunice, untie your hands with the complete sizing tool for engineers and installers.

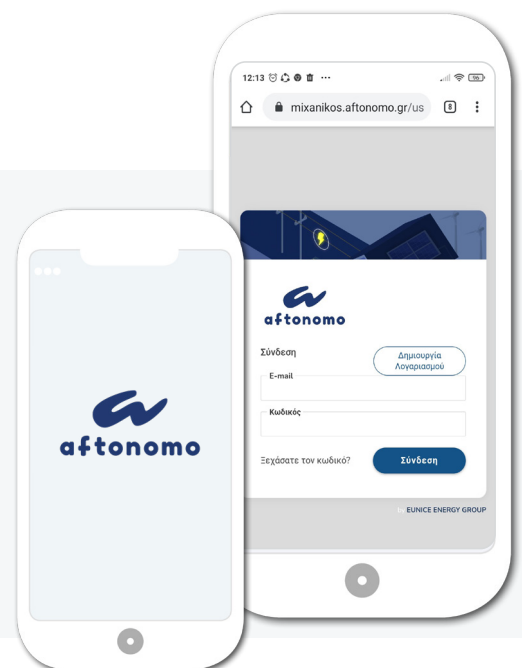

Use the platform, get the complete result and suggest to your client the best solution of energy autonomy and independence.

mixanikos.aftonomo.gr

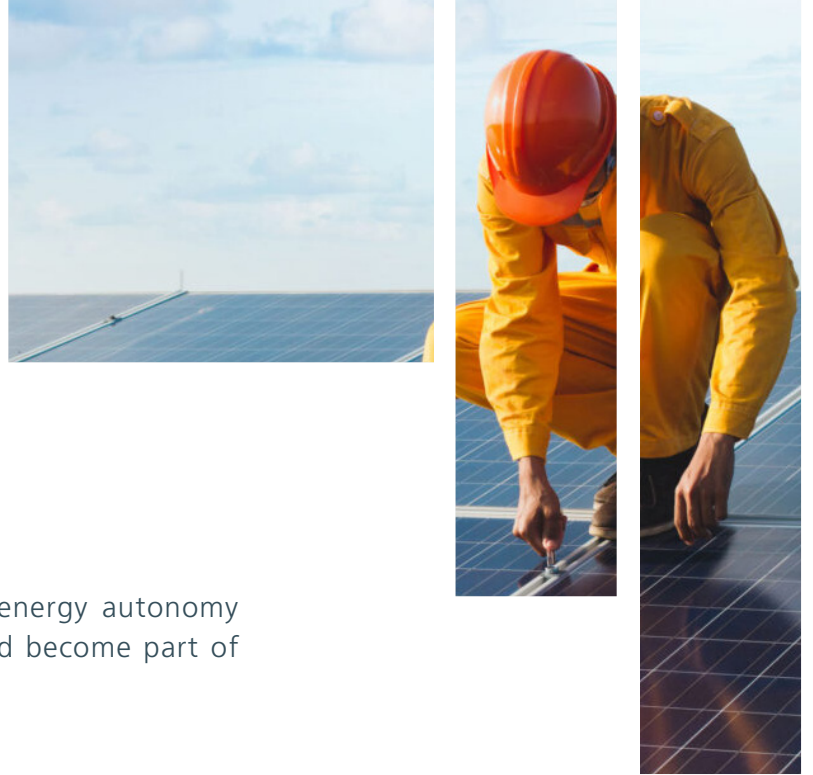

Register through the online platform and use it for free!

1. Create your own profile on the platform, so that you have all your projects organized
2. Enter basic information about the installation you are interested in and its consumption
3. Get the result of the complete Aftonomo by Eunice system solution that you can install yourself in your customer

IN YOUR HANDS

the complete sizing system you need.

Gain access to a new field of activity, the energy autonomy systems. Now, move on to the next step and become part of the energy autonomy and independence.

Get results for:

- The number of photovoltaic panels and the power to be installed
- The number and type of inverters of the system
- The battery capacity
- The support systems that will be used to mount all of them
- The annual cost savings, and reduced CO₂
- The indicative cost of the system

The advantages of the platform.

Ease in Use ●

and in the data entry.
